Radisson Blu Hotel, Bengaluru

About SCDM

Established in 1994, the Society for Clinical Data Management (SCDM) is a non-profit, international organization of over 2,800 members founded to advance the discipline of clinical data management.

SCDM members are charged with promoting quality and excellence in data management and are dedicated to the development, support and advancement of clinical data management professionals. SCDM is organized exclusively for educational purposes and seeks to engage with relevant organizations that can support to advance its mission.

Our Mission

Connect and inspire professionals, managing global health data, with global education, certification and advocacy.

Our Vision

Leading innovative clinical data science to advance global health research and development.

India Steering Committee Members

Nagalakshmi Shetty (VP, Biometrics), ICON

Praveen Dass (Global Head – Biometrics, CONEXTS) Novartis

Tushar Sakpal (Director & Head of Clinical Data Standards Content), Novartis

Ram Mudaliar (Senior Director India CDI Lead, Clinical Data & Insights – CDI), AstraZeneca

Inderbir Singh (Executive Director, Data Sciences, Biometrics), Syneos Health

Deepu Joseph (VP & Country Head), Excelya India

Shobhit Shrotriya (Managing Director, Global Life Sciences R&D Operations), Accenture

Srinivas Subramani (Vice President, Data Management), Accenture Pharmaceutical Services

Deven Babre (Director – Analytics and Benchmarking), GSK

Constantine Stephen (Senior Director – Clinical Data Management), IQVIA

Dr. Anitha Kumari (Global Head of Operations- GDO), Novartis

Rajesh Kunhandy (Head Data Monitc and Management), Pfizer

Dr. Deepak Kallubundi Senior Director (Head of Clinical Data Management Operations) FSPx, Labcorp Drug Development

Nikita Agnihotri (Strategy, Sourcing & Processes Head), Johnson & Johnson

Priyadharshini Lobow (Director, Data & Analytics), Eli Lilly

Kiran Chandrashekar (Senior Direct Data Management, GDO), Parex International

Virtual SDE

SCDM India

Single Day Event (Virtual)

11th Edition

19th February 2022 | Saturday

Theme: Thriving during the Pandemic

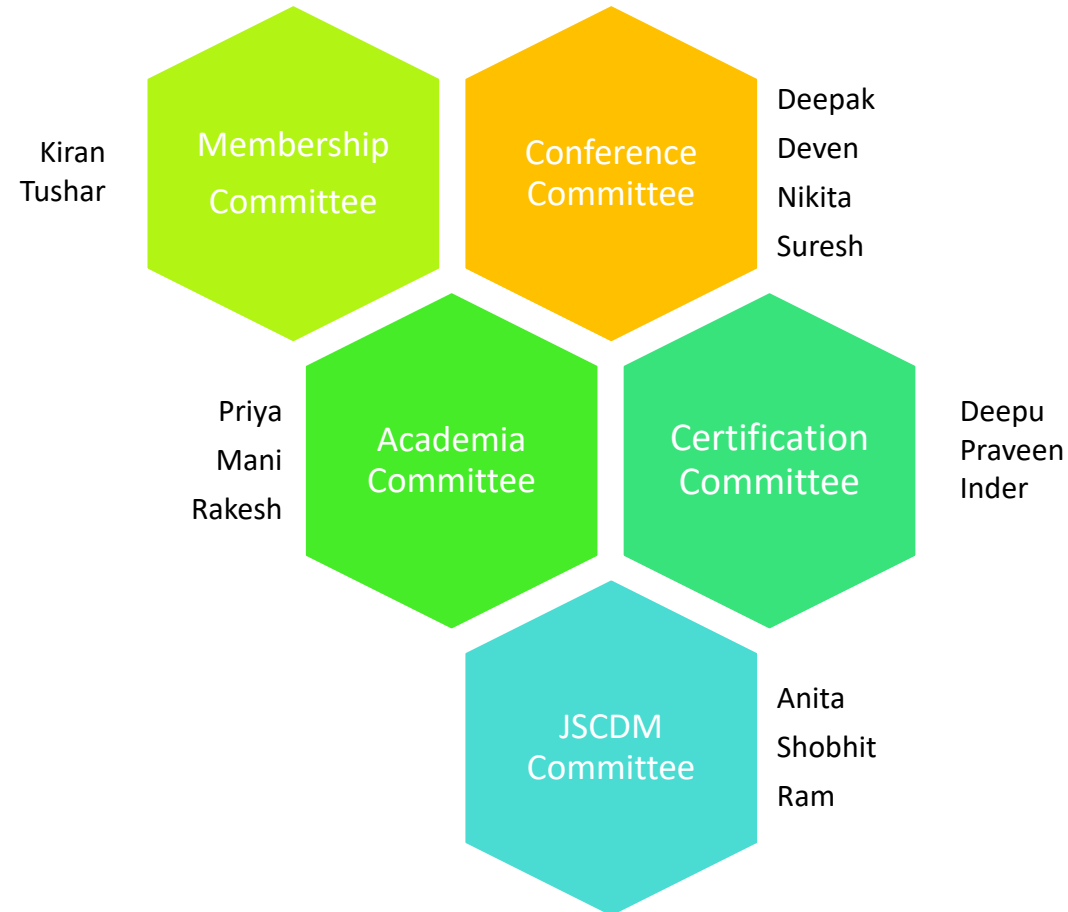

Thriving during the pandemic – How the industry is building resilience with innovation and creative thinking across People, Process and Technology practices.

Our theme for the first **SCDM Single Day Event** cannot be more relevant at this point in time. As industries and organizations continue to adapt to these unprecedented times, clinical research industry has not only adapted to the times but also questioned status quo and captured this opportunity to innovate. For an industry that is known for its relatively orthodox approach to change, the disruption due to pandemic has become the battle cry for innovation and transformation.

People, Process and Technology are the proverbial pillars of any institution. Through this event, we bring you curated stories, case studies and diverse perspectives on how as an industry we not just survived but thrived during the pandemic. Our hope is that this event provides you, as a clinical research professional, an opportunity to recognize and learn about some of the People, Process and Technology innovations and transformations that puts us on the path to be future ready.

Certification

Certification

We established the Certified Clinical Data Manager (CCDM®) program to help clinical data managers to institute a standard of knowledge, education and experience by which they would be officially recognized by the profession.

The CCDM® program has been designed to identify credible, trained, qualified and committed professionals in Clinical Data Management (CDM) and provides real-time feedback for organizations seeking to hire the best and the brightest in their field.

Benefits in obtaining the CCDM Certification:

- **Professional recognition:** Potential promotion or increased responsibility.
- **Personal satisfaction:** Validation of CDM knowledge and skillset and recognition by peers.
- **Organizational recognition:** Job postings may specify CCDM preferred or required.
- **Industry-wide acceptance by data management professionals:** Growth of CDM industry and breadth of offerings.

About

The Journal of the Society for Clinical Data Management, is the society's open access, peer-reviewed publication. The mission of JSCDM is to promote and publish scholarly work with direct relevance to the practice of Informatics and Data Science in clinical research. Articles of interest include reports of original research, review articles, design manuscripts, case studies, demonstration projects, education and professional development, and topic briefs including tutorials and perspectives.

For more information, contact the JSCDM Chief Editor, Meredith Nahm Zozus, PhD, CCDM or the Editorial Coordinator LaTrese Wallace at the JSCDM Editorial Office: info@scdm.org
